

# K12 Central

## Implementation Guide

Version **1.0**

# Table of Contents

3 How this document is structured

4 App Icon

5 Tint Color

6 District Logo

7 Launch Image

8 Main Menu Icons

9 Secondary Links

10 Campus Images

The screenshot shows the 'Setup' page of the Mosaic application. The page is divided into several sections, each with a numbered annotation pointing to it:

- 3** How this document is structured: Points to the 'Setup' section header.
- 4** App Icon: Points to the 'App Icon' field under 'App Settings'.
- 5** Tint Color: Points to the 'Tint Color' field under 'App Settings'.
- 6** District Logo: Points to the 'District Icon' field under 'Launch'.
- 7** Launch Image: Points to the 'Launch Screen Image' field under 'Launch'.
- 8** Main Menu Icons: Points to the 'Default Set' under 'Sidebar & Links'.
- 9** Secondary Links: Points to the 'Secondary Links' section.
- 10** Campus Images: Points to the 'Additional Image Assets' section.

The 'Setup' page includes the following sections:

- App Settings:** General (App Name, App Icon, Tint Color), Launch (Launch Screen Text, District Icon, Launch Screen Image), and About (Support Text, EULA Link, Privacy Link).
- Sidebar & Links:** Sidebar (Default Set, Digest, Notifications, My Profile, Events, Contacts, Resources) and Secondary Links (Yosemite Catha..., nps.gov/yose, App Store URL, School Visibility, Background Image).
- Additional Image Assets:** Campus Images (Select a school to upload an image, or use the batch upload feature. Includes buttons for Yosemite, Colima, Cupertino, Elsinore, Palo Alto, and others).

New Device Page

# App Icon

*At vero eos et accusamus et iusto odio  
dignissimos ducimus qui blanditiis  
praesentium voluptatum deleniti atque  
corrupti quos dolores et quas molestias*

min size (480 x 480)

## What I upload or select

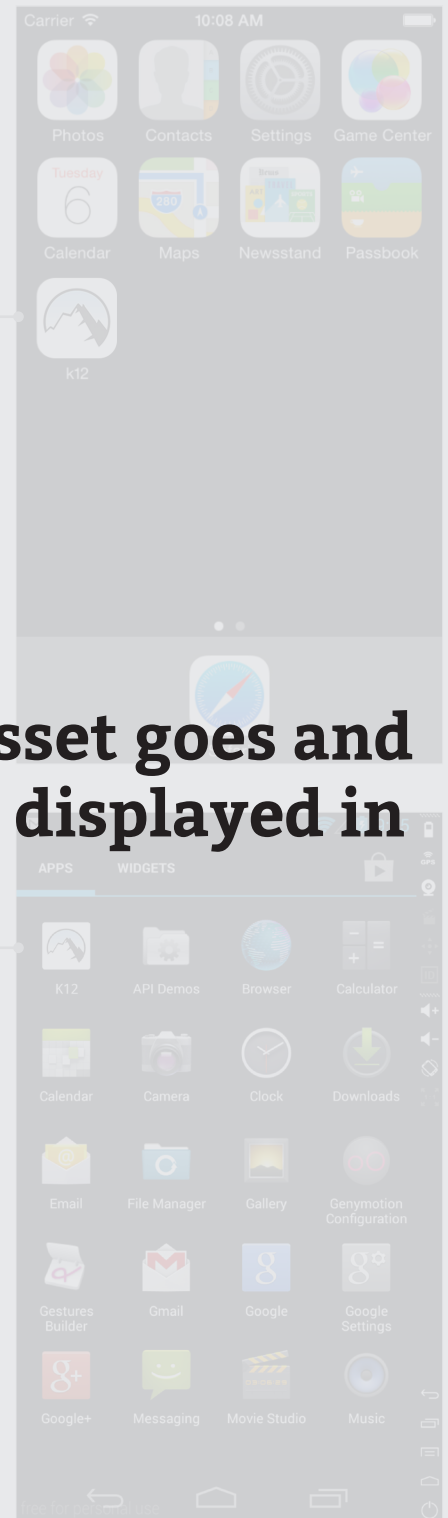

Section includes

1. Description of asset
2. Minimum size requirement
3. Other Suggestions

## Where asset goes and how it is displayed in the app

App Icon in Android

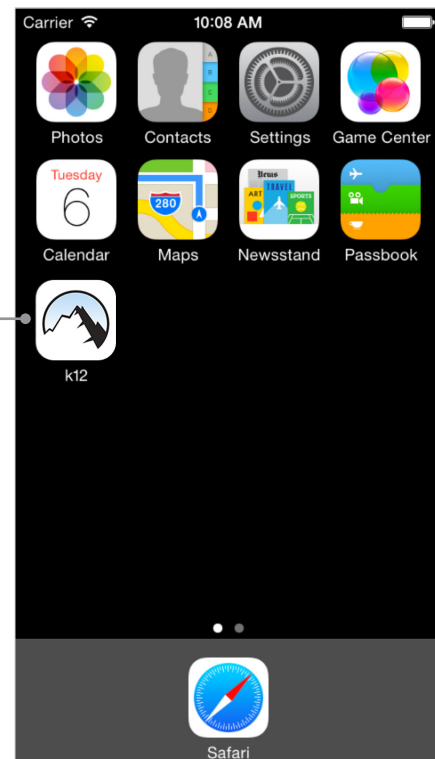

# App Icon

The app icon appears on the home screen of the device. iOS will round the corners if you upload a square image. Android will not. Mosaic will not do any image processing on this icon.

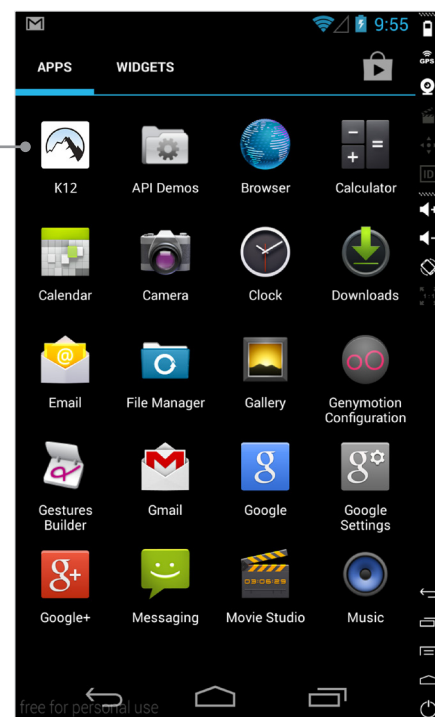

min size (480 x 480)

App Icon in iOS

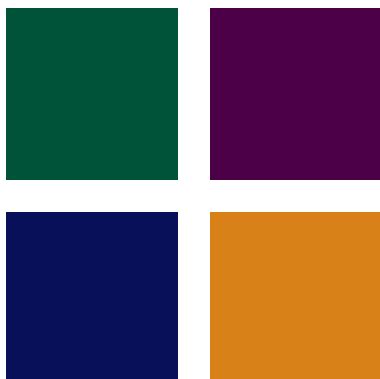

App Icon in Android

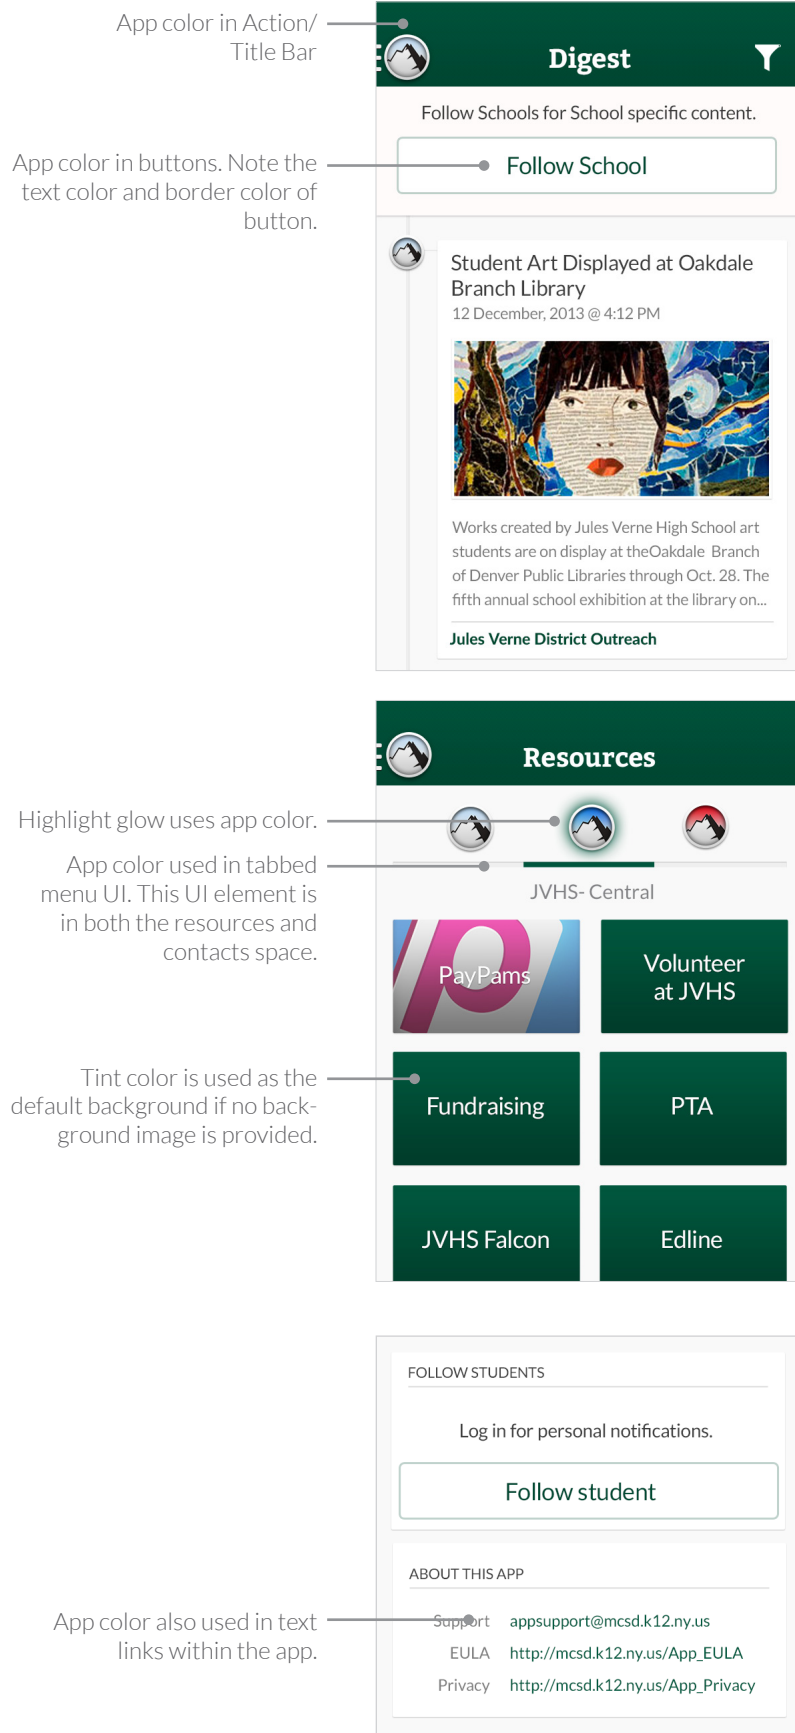

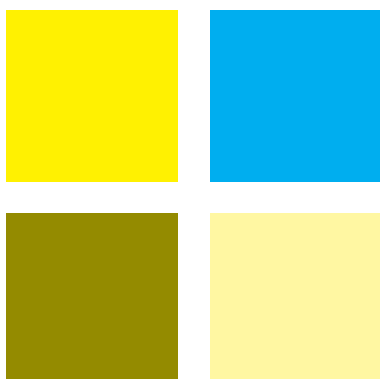

# Tint Color

Color is a very important part of the K12 application, even if it is not immediately apparent. We suggest picking rich, saturated colors. Avoid using lighter colors as they typically don't provide enough contrast with the controls.

Good color choices

Poor color choices

# District Logo

*This asset will be used in two places throughout the app. Mosaic will scale down your district logo to fit in the action/title bar, and in the login page, while it will display at full resolution on the launch screen.*

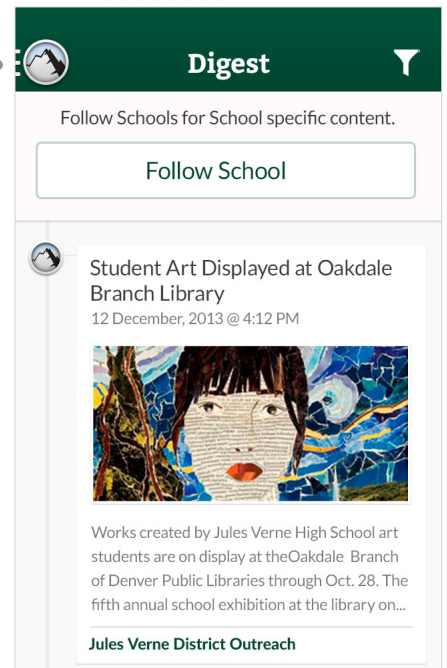

*min size (480 x 480)*

*Note: Mosaic will not do any image processing.*

Logo in Launch Screen

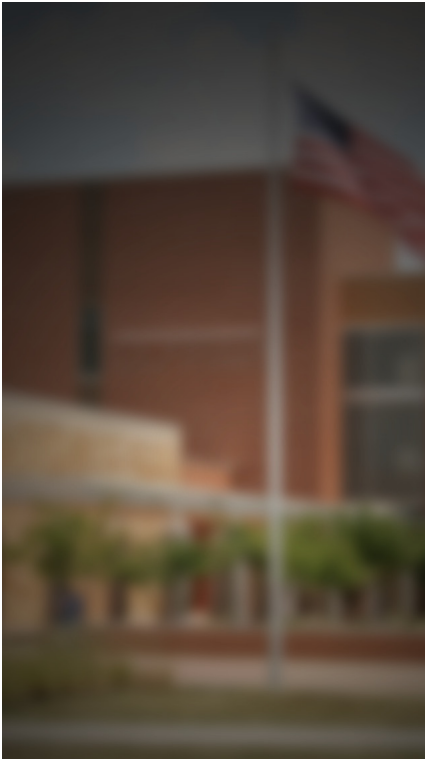

Logo in Action/Title Bar.  
(scaled down)

# Launch Image

The Launch image supports the branding that most districts/schools are looking for in an app. This asset will be displayed in the initial launch screen. In addition, the image is used on all login/sign-up pages and when following schools and/or students

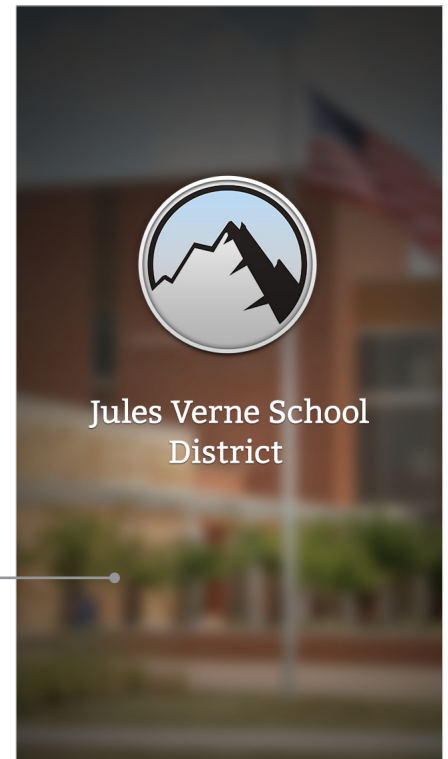

min size (1080 x 1920)

Note: Mosaic does not do any image processing. While it is not required, for readability and design quality, we highly suggest applying:

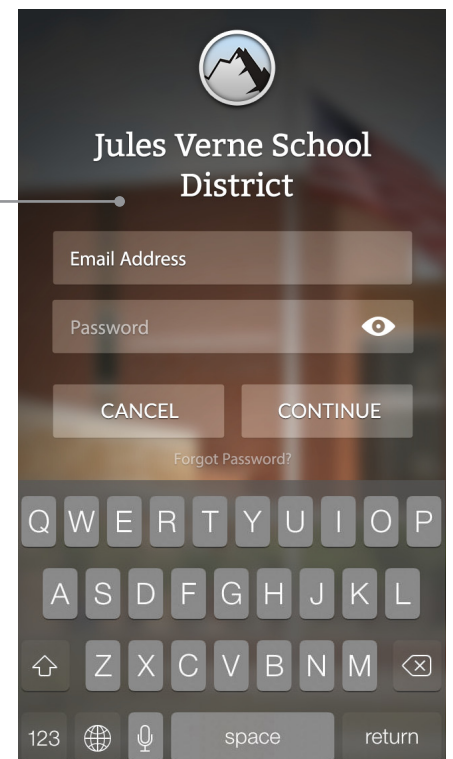

Gaussian blur of 5px

Radial vignette (from center of screen) overlay from transparent to semi-transparent dark grey.

Launch Image on Launch Screen

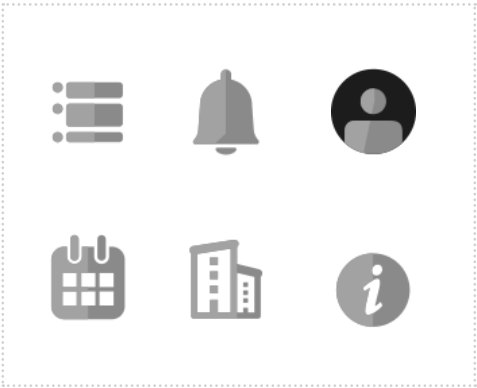

Launch Image on Login Screen.

# Main Menu Icons

These assets will only be used in the main menu of the K12 App. The main menu includes native spaces and primary links (which will allow customers to include web urls in the root menu of the app). Each primary link will require an icon that should match the design of the set; however, these icons cannot be automatically included in the main set. Many sets can be included, and the user can switch between default and alternate sets.

## Navite Spaces

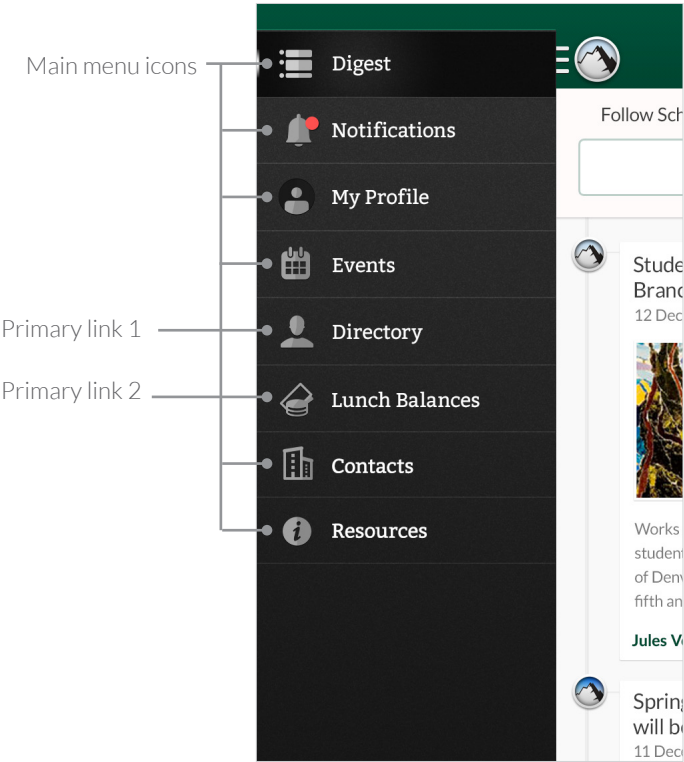

min size (112 x 112)

## Primary links

min size (112 x 112)

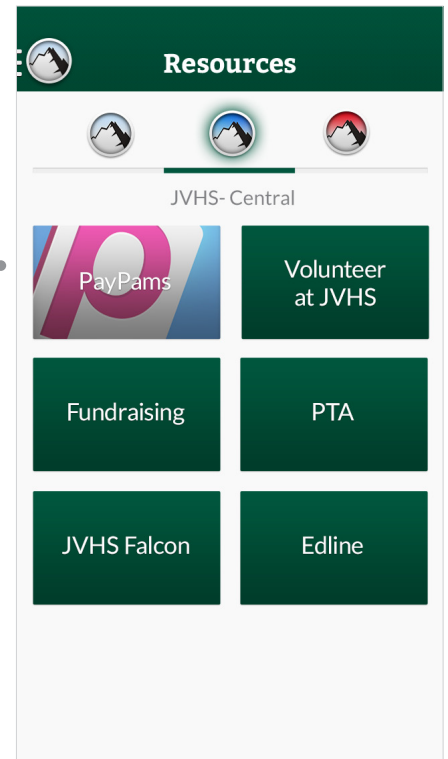

# Secondary links background images

*Each School, as well as the district, will have a section in the 'Resources' space to include important links for their schools. Keep in mind that these images will have white text overlaid over them (we may need to tweak this, but for now the text is white).*

*min size (316 x 180)*

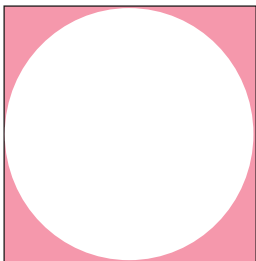

Secondary link with  
image background

# Campus Logos

You will have to upload an image for each campus you have in a district.

In the cases where you don't add a campus logo, mosaic will use a default placeholder image.

min size (105 x 105)

Note: Mosaic (the device-side) crops images into circles, adds border and adds glow. The image is cropped with an inscribed circle.

JVHS-EAST logo in Digest

JVHS-CENTRAL Logo in Digest
